## Average Radon Levels by County

### Legend

Average Level (pCi/L)

**Notes:**

The amount of radon in the air is measured in "picocuries per liter of air" or "pCi/L". The risk of contracting lung cancer from radon depends on how much radon is in your home, the amount of time you spend in your home, and whether you are a smoker or have ever smoked. The EPA recommends to take action to reduce radon in your home if the level is 4 pCi/L or higher. Even radon levels below 4 pCi/L pose some risk because there is no safe level of radon.
